

INTELLIGENT TOOL MANAGEMENT

iLockerz smart trolleys offer a secure way to store, track and manage tools essential to automotive, construction, engineering, aerospace and public sector organisations.

iLockerz manufactures a range of intuitive storage solutions which provide greater visibility and accountability over high value tools and essential workplace equipment.

Every tool can be tracked as they move in and out of iLockerz trolley drawers, with powerful RFID technology providing a fully automated and comprehensive audit trail of tool usage.

In addition, the powerful web software built into each iLockerz tool trolley allows for smarter calibration management and removes foreign object detection (FOD) issues for aerospace organisations.

Innovative solutions for tracking and managing:

- Power/Mechanical Tools
- Calibrated Socket Wrenches
- Diagnostic Devices
- Protective Gear ...and more

Each locker trolley and cabinet can accommodate multiple use needs and various equipment types, with repair alerts enabled for damaged tools.

Multiple configurations, one solution

Designed to withstand high-volume use, *iLockerz* are manufactured using 2mm thick steel security housing and can be customised to suit individual requirements, offering:

- A range of in-compartment power and charging options
- A combination of locker doors and drawers
- Emergency manual key override
- Charging station compartments
- PIN code, card swipe or fingerprint access
- A range of RFID tags to suit all types of equipment
- HD colour photo record of each transaction
- Emergency battery back-up

Powerful web software, seamless management

iLockerz solutions are configured with intuitive back-end web software, providing:

- Smart-Tracker™ or Radio Frequency Identification technology, verifying every transaction and device location
- Comprehensive audit trail for all item and system usage
- In-built web server and wi-fi connectivity for easy management
- Web-based locker management software to effectively and automatically manage calibration intervals
- Alerts to notify when items need to be re-calibrated or repaired
- Access control system integration
- Stand alone or fully networked configuration
- Remote access and locker release via software
- Record of damage to items returned to tool trolleys, with email notifications automatically sent to administrators via the web-based management software and tool drawer lock-down
